RE: Villarruel Architects

To whom it may concern:

I am a Senior Program Manager with the Oakland Unified School District where I have worked as a consultant for the last 10 years. At various intervals during the past 6 years I have had the pleasure of working with Villarruel Architects in general and Antonio Villarruel in particular.

We have worked together on a number of projects (5) on the same high school campus ranging from science labs to small school initiatives to modernizations. Regardless of the project size Antonio has always been thorough in his work and responsive.

His documentation has been consistent and accurate and his demeanor professional, despite at times a turbulent environment. He has strived to maintain the schedule and budget and continually offers viable options to improve both. They are committed to getting our projects completed on time and on budget and have an excellent understanding of our facility needs.

I have no hesitation in recommending Villarruel Architects and have confidence that they will provide a positive experience.

Sincerely,

Al Anderson, AIA
